

Sprint 7 Retrospective

What didn't go well:

- Work wasn't as polished as expected
- Felt burnt out

Action Items:

- @Team Take a day off as a mini break for burnout
- @Team Clone GitHub repository to local machine

	Action item from last retrospective
	Action item N/A in this sprint

What went well:

- 1 day break (6 day sprint)
- Github branches were properly created to avoid pushing to main branches, etc.

What didn't go well:

- Did not correctly implement LLD to a granular level x6
- Story owners did not utilize supporting member times effectively
 - Did not specifically assign layers/classes to implement
- Rigorous test cases were not created prior to coding

Action Items:

- @Team Revisit LLD
- @Team Abstract DAL
- @Kevin Output the network diagram draft
