High-Level Design

1. Activity flow - Client request:

2. Activity flow - System response:

Low-Level Design

User story: As a user, I can create a new account with a valid email and a valid passphrase.

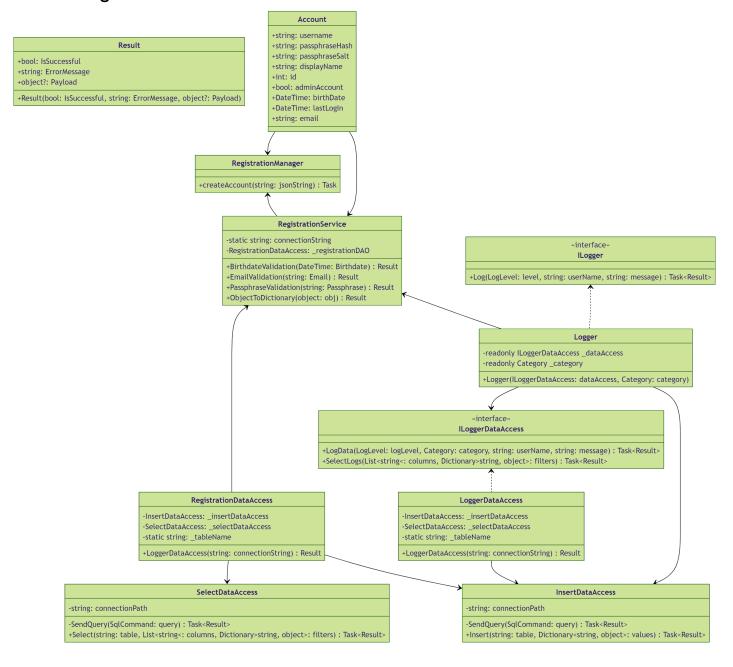

Preconditions:

- 1. User must have no active authenticated session.
- 2. User must be on the Registration view.

Business Rules:

- User provides a valid email and a valid passphrase to register.
 - o A valid email is in format: email@example.com
 - o A valid passphrase satisfies the following constraints:
 - i. Minimum length of 8 characters
 - ii. Consists of the following:
 - blank space
 - a-z
 - A-Z
 - 0-9
 - .,@!-

Class Diagram

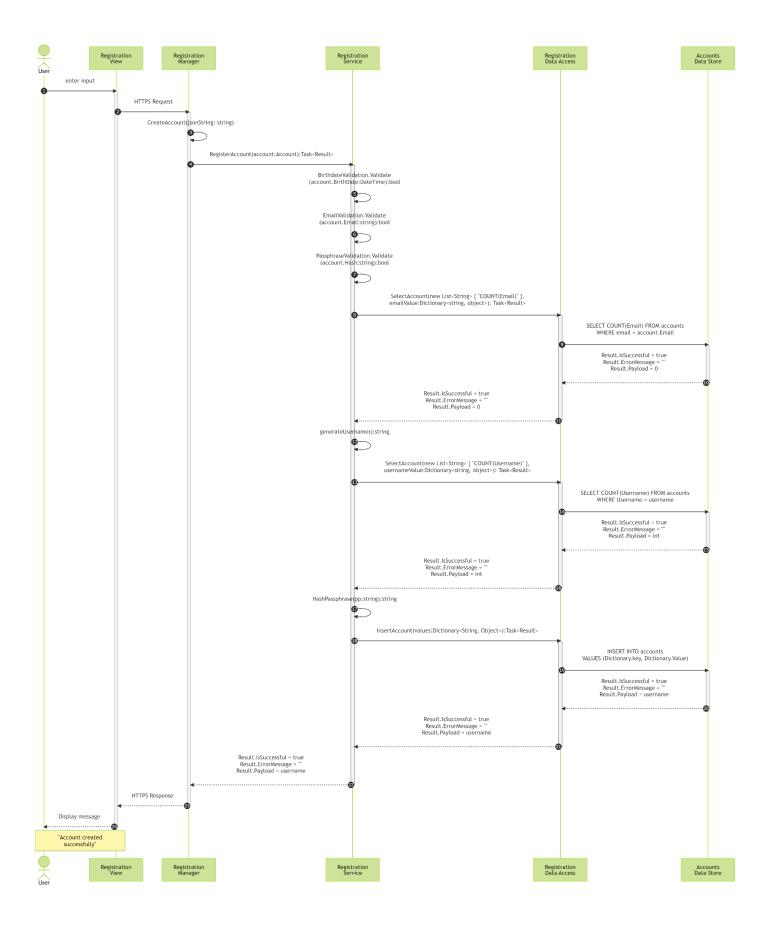

Successful Use Case(s)

1. User provides a valid email and a valid passphrase. Within 5 seconds, the system assigns a system-wide unique username then displays a message to the user - "Account created successfully".

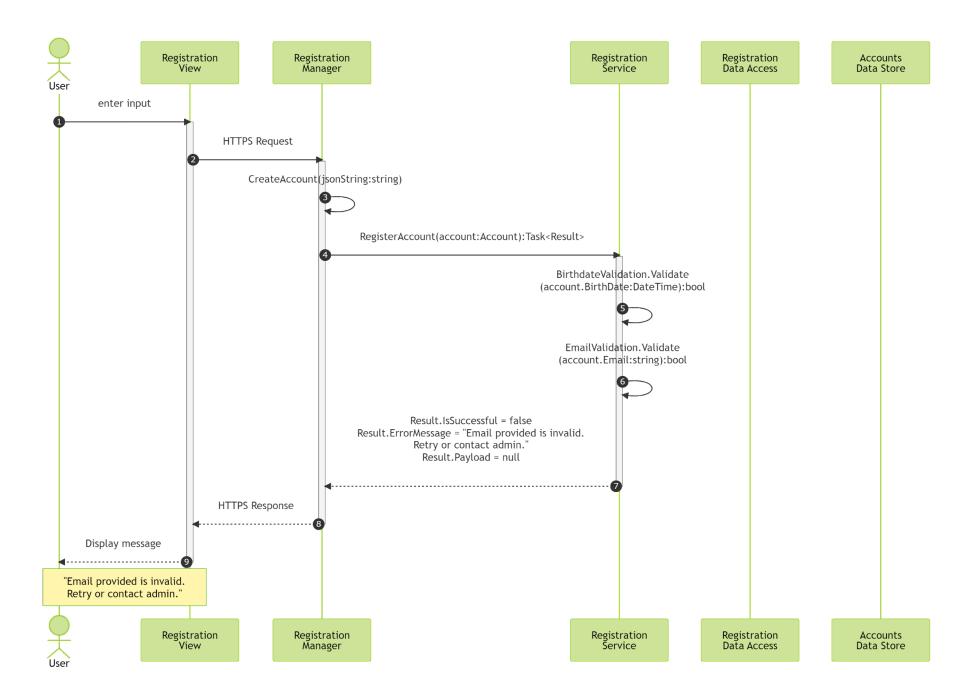

Note:

- Email character validation requirement will be satisfied in step 6
- Email uniqueness validation requirement will be satisfied in steps 8-11
- Passphrase character validation requirement will be satisfied in step 7
- Username generation requirement will be satisfied in steps 12-16
- Account creation requirement will be satisfied in steps 18-21
- Message display requirement will be satisfied in step 24

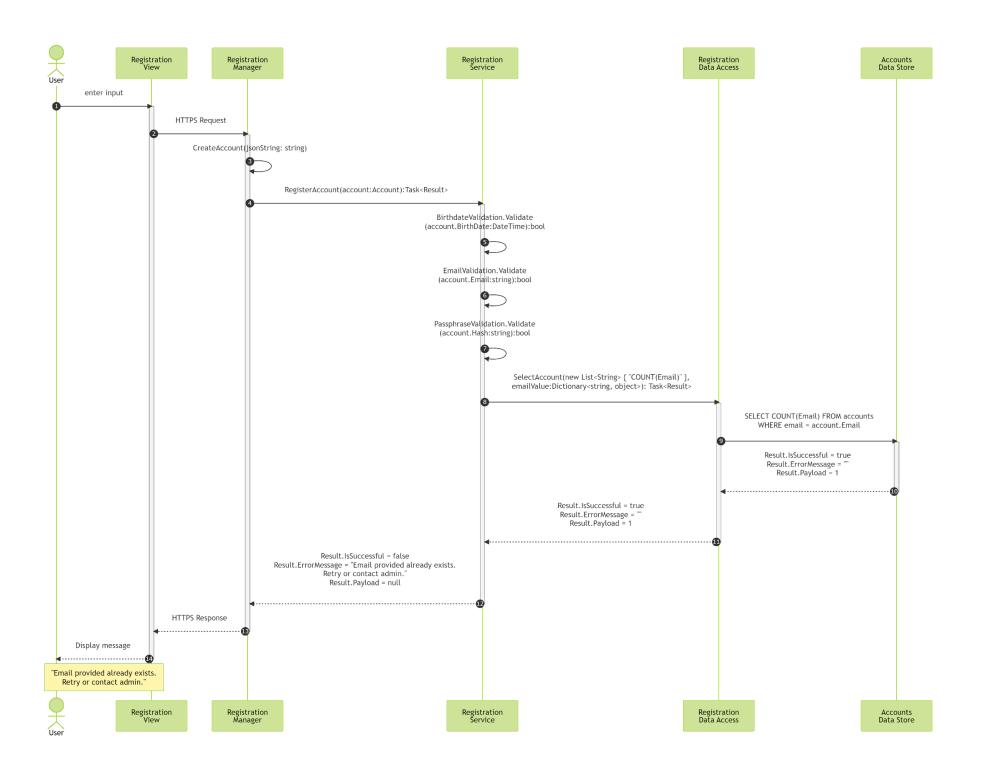

Failure Use Case(s)

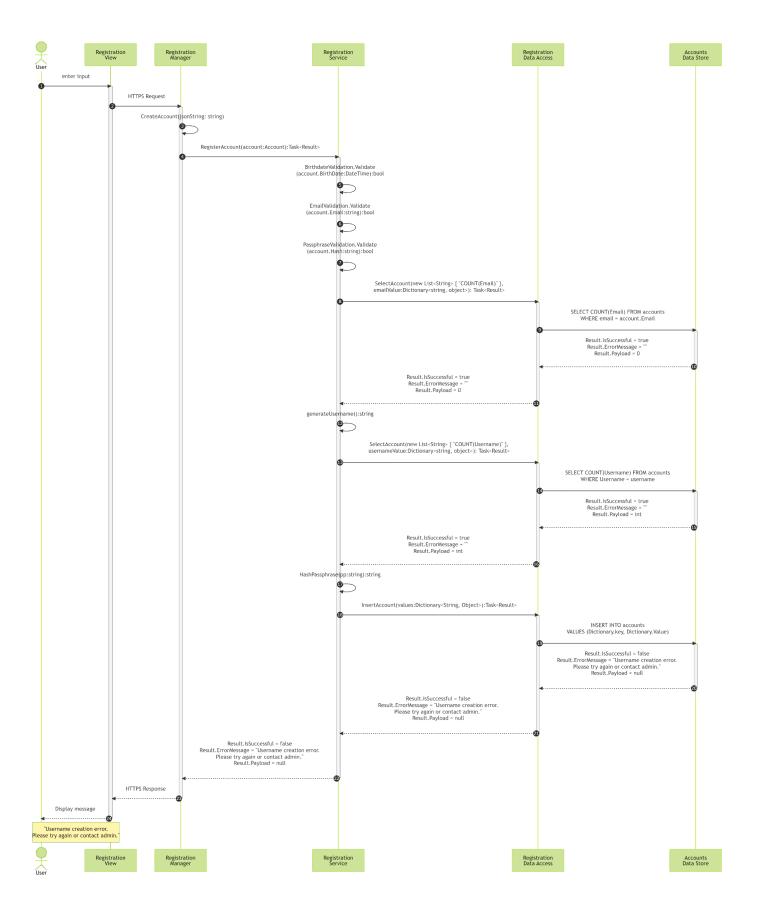

- 2. An invalid email is provided on registration. The system displays a message "Invalid email provided. Retry again or contact system administrator". The system doesn't create a new account.
 - 2a. Email's format is not satisfied

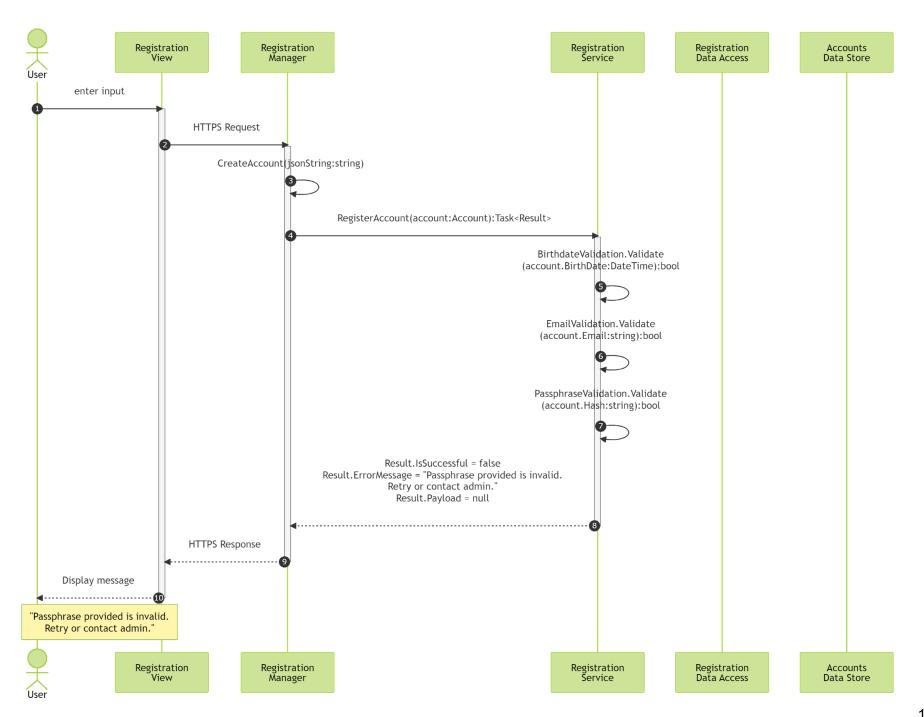

2b. Email provided already exists

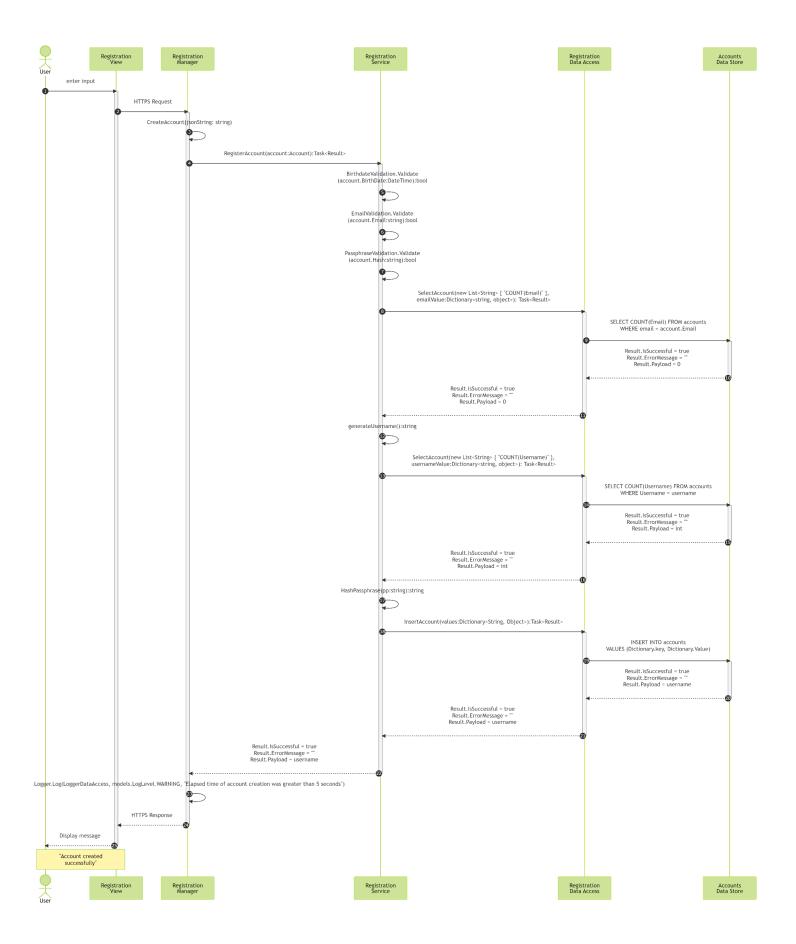

3. User provides a valid email and a valid passphrase to register; however, the system doesn't assign a system-wide username. User receives a message - "Username creation error. Please try again or contact system administrators.". There's no account created.

4.	User provides an invalid passphrase to register. User receives a message - "Passphrase provided is invalid. Retry or contact system administrator". No account is created.

5.	User registers with a valid email and valid passphrase. The system was able to assign a system-wide username. Entire process took longer than 5 seconds. A system log entry is recorded. Account is created.				

Integration Test Plan¹

ID	Description	Extra Information	Input	Expected Output
Reg01	Successfully create the 1st account	Follow standard AAA testing guidelines	Email= <u>TestEmail1@gmail.com</u> Passphrase=Test Case Reg-01 Birthdate =2001-01-01	Unique Username
Reg02	Successfully create the 2nd account with multiple periods after the "@" sign	Follow standard AAA testing guidelines	Email= <u>TestEmail2@gmail.com</u> Passphrase=Test Case Reg-02 Birthdate =2001-01-01	Unique Username
Reg03	Attempt to create the 3rd account with invalid email of no "@" sign	Follow standard AAA testing guidelines	Email=Test3.com Passphrase=Test Case Reg-03 Birthdate =2001-01-01	System Message: "Email is invalid. Retry or contact admin."
Reg04	Attempt to create the 4th account with invalid email of no period after the "@" sign	Follow standard AAA testing guidelines	Email=Test4@com Passphrase=Test Case Reg-04 Birthdate =2001-01-01	System Message: "Email is invalid. Retry or contact admin."
Reg05	Attempt to create the 5th account with invalid email of no arguments after the period	Follow standard AAA testing guidelines	Email=Test5@gmail. Passphrase=Test Case Reg-05 Birthdate =2001-01-01	System Message: "Email is invalid. Retry or contact admin."
Reg06	Attempt to create the 6th account with invalid email of no arguments before the period	Follow standard AAA testing guidelines	Email=Test6@.com Passphrase=Test Case Reg-06 Birthdate =2001-01-01	System Message: "Email is invalid. Retry or contact admin."
Reg07	Attempt to create the	Follow standard AAA testing guidelines	Email=TestEmail1@gmail.com	System Message: "Email

_

¹ https://www.guru99.com/test-case.html

	7th account with duplicate email		Passphrase=Test Case Reg-07 Birthdate =2001-01-01	provided already exists. Retry or contact admin."
Reg08	Attempt to create the 8th account with invalid passphrase of no invalid characters	Follow standard AAA testing guidelines	Email= <u>TestEmail8@gmail.com</u> Passphrase=Test Case Reg(08) Birthdate =2001-01-01	System Message: "Passphrase provided is invalid. Retry or contact admin."
Reg09	Attempt to create the 9th account with invalid passphrase of too little characters	Follow standard AAA testing guidelines	Email= <u>TestEmail9@gmail.com</u> Passphrase=2smol-9 Birthdate =2001-01-01	System Message: "Passphrase provided is invalid. Retry or contact admin."
Reg10	Attempt to create the 10th account	Need to time out the system for 5 seconds. Follow standard AAA testing guidelines	Email=TestEmail10@gmail.com Passphrase=Test Case Reg-10 Birthdate =2001-01-01	Unique username
Reg11	Attempt to create the 11th account	Follow standard AAA testing guidelines	Email= <u>TestEmail11@gmail.com</u> Passphrase=Test Case Reg-11 Birthdate =2015-01-01	System Message: "Age requirement not reached."

References

This document elaborates client's requirements² for one of the product's core components - REGISTRATION.

The requirement is designed based on the system architecture provided in High-Level Design Document³.

The diagrams included in this document utilized diagrams.net⁴ and Mermaid.js⁵.
