Sprint 20 Retrospective

Sprint 19 Retrospective Action Items:

What to work on:
- ● @ Team - Complete Peer Reviews for features
- ● @Team - **FINISH ALL DESIGN AND FEATURE IMPLEMENTATION**

Sprint 20 Retrospective:

What went well:
- ● @ Team - Finished all designs and nearly all individual features for code review
- ● @ Team - Finished peer review for each member ahead of code review
- ● @ Team - Successfully merged all feature branches and built working solution
- ● @ Bryan - Used flex position to help others with their coding
- ● @ Garrett - Implemented file upload feature outside of assigned sprint work-items

What went wrong:
- ● @Tien, Kevin - Did not complete frontend to full BRD requirements
  - ○ Lack of frontend experience hampered coding progress and testing
- ● @ Team - Insufficient front end testing
  - ○ Did not test all failure cases or UI cases for most features
- ● @ Darius, Jett - Did not finish features early enough for Bryan to test his own implementation
  - ○ Bryan could have optionally created dummy objects to test after conferring with project owners about the object parameters

What to work on:
- ● @ Team - Finish project and features to fulfill all BRD requirements
- ● @Team - Host project on AWS
