Sprint 19 Retrospective

Sprint 18 Retrospective Action Items:

What to work on:
- @ Team - Keep action items realistic based on future schedule and listed capacity
  - For all holidays break time, dedicate the amount of holiday break days + 2 days for time off during sprint planning

Sprint 19 Retrospective:

What went well:
- @ Team - Percentage of uncompleted work went down by 4% compared to previous sprint
- @ Team - LLD is almost complete or already complete for all features

What went wrong:
- Did not hit goal of 50% hours planned for target percentage
  - In sprint 17 (2 sprints ago) we set a future goal of completing undone work but are still behind due to other class obligations
- Difficulty finalizing feature dependent variables
  - Some features relied upon shared database schemas and there were delays finalizing and deciding on a design.
- @Darius, @Jett, @Bryan, @Garrett - Completely redid file upload design based on new information about file upload requirements

What to work on:
- @ Team - Complete Peer Reviews for features
- @Team - **<u>FINISH ALL DESIGN AND FEATURE IMPLEMENTATION</u>**
