Sprint 17 Retrospective

Sprint 16 Retrospective Action Items:

What to work on:
- @ Team - Compile questions to ask Vong on March 6 for e2e testing
- @ Jett - Create Vong's version of scrum chart for the past sprints
  - Post to github repo
- @ Team - Compile all questions from Friday's daily meeting and email Vong immediately after instead of waiting for the next class session/office hours
- Sprint 17 Target Percentage:
  - 50% of hours planned (295 hours total)

Sprint 17 Retrospective:

What went well:
- @ Team - Compiled questions to ask Vong for e2e testing regarding Cyprus
- @ Jett - Completed Vong's version of scrum chart for past sprints and posted to github
- @Tien - Successfully implemented sessions with cookies
- @ Bryan - Did not need to email Vong, we were able to research the questions ourselves to a sufficient degree of success
- @ Kevin - Completion of the notification feature coding review
  - Each member contributed in some part to pushing the feature to production

What went wrong:
- Did not hit goal of 50% hours planned for target percentage
  - Team worked on reformatting existing code and did not progress towards our new work-items
- Not enough time was allocated for writing e2e test cases during the sprint and as a result the team felt hurried prior to the code review deadline
  - Inexperience with the e2e testing software was a factor in this issue

What to work on:
- @ Team - Finishing up carry-over items from last sprint
  - Major priority, at risk of falling behind schedule to an unrecoverable degree
  - Aim for full completion of design documentation
- Sprint 18 Target Percentage:
  - 100% of carry-over hours completed (140 hours total)
